With more than 50 million medical devices implanted over the course of more than 45 years, Gore builds on its legacy of improving patient outcomes through research, education and quality initiatives. Gore engineers medical devices that treat a range of cardiovascular and other health conditions. With more than 45 million medical devices implanted over the course of more than 40 years, Gore builds on its legacy of improving patient outcomes through research, education and quality initiatives. Product performance, ease of use and quality of service provide sustainable cost savings for physicians, hospitals and insurers. Gore is joined in service with clinicians and through this collaboration we are improving lives.

Located in Southern Arizona, Benson Hospital is a Critical Access Hospital, licensed for 22 beds, serving the health care needs of the San Pedro Valley Hospital District and the surrounding areas since 1960. Benson Hospital is your local source for health care including 24/7 emergency care, inpatient and skilled nursing services, outpatient services, and primary care clinics. Benson Healthcare reaches beyond the walls of Benson Hospital to educate and promote health, wellness and safety throughout the San Pedro Valley. Improving the health of the community is the core intent of all our efforts and the basis of our mission.

Penumbra, Inc., headquartered in Alameda, California, is a global health care company focused on innovative therapies. Penumbra designs, develops, manufactures and markets novel products and has a broad portfolio that addresses challenging medical conditions in markets with significant unmet need. Penumbra sells its products to hospitals and health care providers primarily through its direct sales organization in the United States, most of Europe, Canada and Australia, and through distributors in select international markets.
